What is TerraGo Publisher for Raster?

TerraGo Publisher for Raster is an application for publishing geospatial raster maps and imagery as GeoPDF® documents for use with TerraGo Toolbar which brings GIS-lite capabilities to document and other workflows. Information otherwise locked away in arcane geospatial raster formats can be made available to a much wider audience as GeoPDF documents that can be measured, analyzed, and annotated with TerraGo Toolbar.

What's new in this release?

Updated naming scheme for multi-image CADRГ

Version 7.1.0 has an improved output naming scheme when processing CADRГ and other RPF formats with multiple images.

Synchronized version number across entire application

Version 7.1.0 now reports the same application version number for the online help, processing data using the command prompt, using --version, user interface and the installer.

Resolves no coordinates found with certain UTM GeoTIFF images

Version 7.1.0 now pulls the WKT from the GCP tag when the WKT is not listed in the standard tag. This resolves the application from reporting no coordinates found with certain GeoTIFF images with UTM and Transverse Mercator projections.

What's new in 7.0.4?

Added support for newer versions of Microsoft Windows Server

Version 7.0.4 adds support for Windows Server 2016 and Server 2019.

What's new in 7.0.3?

Installation and license activation refinements

Version 7.0.3 addresses installation and license activation issues seen on some systems.

What's new in 7.0.2?

Expanded compatibility with older operating systems

Version 7.0.2 is a minor compatibility release.

What's new in 7.0?

Remote desktop access to application

Version 7 provides application access via remote desktop by default.

What are the installation requirements?

Software

Operating systems such as Windows 8.1, Microsoft Windows 10 (versions 1709, 1803, 1809, 1903, 1909), Microsoft Windows Server™ 2008 R2 or Microsoft Windows Server 2012 and 2012 R2 and 2016.

The last version to support Windows 7 SP1 was 7.0.4.2, released July 2019.

You must uninstall older versions of TerraGo Publisher for Raster prior to installing this new version.

Software is tested and officially supported on an English (US) operating system.
