What is GeoPDF Publisher for ArcGIS Pro?

GeoPDF® Publisher for ArcGIS® Pro is an extension to Esri® ArcGIS Pro that allows you to produce and consume GeoPDF documents with ArcGIS Pro. GeoPDF documents can be shared with the broadest possible audience to extend the reach and value of your investment in ArcGIS. GeoPDF Publisher for ArcGIS Pro gives you unmatched capabilities for configuring and optimizing the PDF documents you create with ArcGIS. Additionally, the GeoPDF documents made with GeoPDF Publisher for ArcGIS Pro are enabled for use with the free GeoPDF Toolbar, an extension to free Adobe® Reader® (or Adobe Acrobat®) that provide a host of interactive capabilities that can be exploited by non-GIS users, including an Identify Tool similar to the one provided by ArcGIS Pro, for inspecting feature attributes, simultaneous display of multiple geographic coordinates, measurements, and geospatial markup.

Known issues

Raster images appear faded

Raster imagery in GeoPDF exports may appear faded in earlier versions of ArcGIS Pro version 2.6.

What are the installation requirements?

Software

Operating systems such as Windows 8.1, Microsoft Windows 10 (versions 1709,1803, 1809, 1903, 1909), Microsoft Windows Server™ 2008 R2 or Microsoft Windows Server 2012 and 2012 R2 and 2016 and 2019.

GeoPDF Publisher for ArcGIS Pro (version 1.0.0) requires Esri ArcGIS Pro 2.4, 2.5 and 2.6.

Software is tested and officially supported on an English (US) operating system.

Installation

The installer includes a feature to set the Concurrent License Server Name (CLSN) or automatically activate with an Auth-Code (AC) using the silent installation option.

Command to set the Concurrent License Server Name:
GeoPDF_Publisher_for_ArcGIS_Pro.exe /S /v"/qn CLSN=tlm"

Command to auto-activate using the Auth-Code:
GeoPDF_Publisher_for_ArcGIS_Pro.exe /S /v"/qn AC=1exxxx1f-cxx8-4xx3-bxx9-8xxx7xx1xxx4"
